

DEEPWOOD — Complete Game Overview

"You're searching for Deepwood? Look around you. You're standing in it."

Genre: 2D side-view action-RPG × colony-sim × 100-floor dungeon crawler × Terraria-style mining, with a slow-burn story that reframes everything you've done.

Engine: Godot 4.7 (GDScript). **Player:** a nameless Calamity Orphan — secretly the reincarnate soulmate of a Shadow Monarch.

The pitch: Descend a 100-floor dungeon to free your taken people, rebuild the ruined village of Deepwood into the brightest place in a broken world, defend it from sieges — then learn that a *perfect* village was exactly what your enemy was farming all along.

1. THE PREMISE

Deepwood was the village the whole dying world whispered about — scholars, builders, forges, full tables. When the calamity took everything else, Deepwood **held for years**. Then the waves grew *wrong*: the Despair Army dragged the **strong-willed alive** down into the deep and **turned the weak-willed** into monsters — so the horde at your gate wears your own neighbours' faces.

By the time you arrive, Deepwood is a **ruin**. The one true enemy is the **Monarch of Despair** — "the end of the living." The raiders were never random; they are his **farming apparatus**, and *the apparatus dies with the farmer*. Every road out of the village is a **cage** ("every road out, the horde grows to meet you") — the only escape is **down**, through the root of it.

The secret (sealed until the very end): the choking that took you at Deepwood's treeline in the prologue was not a first meeting. A Shadow Monarch's soul found you years ago, too weak to merge, and has followed you ever since — your improbable survivals "were never luck." Arriving home, the bond finally *completes*.

The Oath the four heroes swear together:

"Free the taken, raise the walls — and when Deepwood stands, I go down after the thing that did this. It lives again, or none of us leave."

Winning means **bringing the people home** — not just killing things.

2. THE CORE LOOP

Descend → **rescue people + recover blueprints + gather materials** → **return, rebuild, staff, defend** → **descend deeper**.

- The **dungeon** (west pit) is where you fight, free hostages, and find blueprints/loot.
 - The **underground** (a minable Terraria world) is the connective cave you dig and explore, holding scattered doors into every floor.
 - The **village** is a full colony sim you rebuild, staff, and defend against escalating sieges.
 - The master clock lives in the autoloader, so **time advances in every scene** — sieges, births, wages, and school all tick while you're deep.
-

3. THE PLAYER

- **Movement:** run speed 200, jump -400, gravity 900. **Fall damage** past a 300px drop (0.15/px); a 2500px void-fall snaps you back (anti-fall-through net).
 - **Purchased mobility:** **Double Jump** (20g), **Dash** (30g — double-tap A/D, speed 900, 0.5s cooldown, afterimages). **Flight/Levitation** (hold Space) is available to *every* class but drains **mana** (16/s, Mage discount); the Aetherwing relic grants it with wings. A **blink-dash (T)** with 0.6s i-frames comes from the Shadowstep Sigil.
 - **Base stats:** 160 HP, 90 mana (regen 4/s), 5% crit / +50% crit damage. Caps: damage reduction 75%, mana shield 80%, status resistance 90%, cooldown reduction 70%.
 - **The hidden Monarch passive (all classes, whole game):** 7 stages tied to character level — **5 / 15 / 30 / 45 / 60 / 80 / 100** (*Stirring* → *Creeping Dark* → *Shadowstep* → *Dread Sovereign* → *Veiled* → *Ascendant* → *Shadow Sovereign*). Stacking +all-damage, damage reduction, and move speed; **7/7 is the 2× "god-form."** Your true nature emerges as you climb — visibly manifesting only when no villager is left to witness it (the Harvest).
-

4. CLASSES & SKILL TREES

Four classes, each a branching tree with **3 spec spines** (tiers 1–7). Every spec **forks at tier 4** into a mutually-exclusive **KEYSTONE pair** (pick one, the other locks *forever*), reconverges at tier 5, and ends in a **tier-7 ULTIMATE**. You pick your class on first opening the tree (K); it's permanent unless you drink a **Reset Potion**. **Shadow Monarch is locked until you beat the game.**

Skill points: **+1 per level-up**; costs rise with tier (up to 6 for ultimates); deep nodes also spend **researched crafting materials** (slime → iron_shard → ember_crystal → void_essence → ancient_relic).

⚔️ Sword — Berserker / Guardian / Warlord

- **Berserker** → *Bloodthirst* (lifesteal) → **Sanguine Pact** vs **Blood Rage** (+40% dmg under 40% HP) → **Avatar of Slaughter** (kills stack +dmg/lifesteal/HP).
- **Guardian** → *Spiked Armor* (thorns) → **Aegis Wall** vs **Riposte** (dodge) → **Living Fortress** (survive one lethal hit/life).
- **Warlord** → *Deathblow* → **Executioner** (instakill non-boss <15% HP) vs **Overpower** → **Headhunter** → **Godslayer**.

🏹 Archer — Marksman / Ranger / Warden

- **Marksman** → *Deadeye* → **Piercing Shot** vs **Killshot** (instakill non-boss <18% HP) → **Skyfall**.
- **Ranger** → *Twin Shot* (+arrow) → **Seeker Arrows** (homing) vs **Evasion** → **Tempest** (4 homing arrows).
- **Warden** (pure DoT) → *Venom Arrows* → **Frost Arrows** vs **Flame Arrows** → **Contagion** (poison spreads).

🧙 Mage — Elementalist / Sage / Mystic

- **Elementalist** → *Ignite* → **Overcharge** vs **Wildfire** (burns leap) → **Cataclysm**.
- **Sage** → *Mana Flow* → **Overflow** vs **Focusing Lens** (a hold-to-channel **beam** that ramps) → **Transcendence**.
- **Mystic** → *Mana Barrier* (pay 40% of hits from mana) vs **Blink Step** → **Spellblade** (wand dmg scales with max mana) → **Avatar of Magic**.
- **Side-roads: Riftweaving** (Z — twin portals, drains mana while both open) and **Telepathy** (your mind reaches the village from anywhere — beats the "village fog").

👑 Shadow Monarch — Legion / Dominion / Ascendant (post-game unlock)

Root: slain foes rise as **shades**, +8% all damage.

- **Legion** → **Standing Army** (shades never fade) vs **Volatile Dead** → **Deathless Legion**.
- **Dominion** → **Sovereign's Dread** (fear aura) → **Deadly Presence** (passive nova) → **Absolute Dominion**.
- **Ascendant** → *Feast of Shadows* (lifesteal) → **Immortal Sovereign** vs **Wrath Incarnate** → **Sovereign of the Dead** (assume the TRUE FORM at will).

5. WEAPONS & TOOLS

Base kit (hotbar 1–0): **Sword** (start), **Spear** (40g), **Bow** (35g). Weapons carry a **grade** (Common→Mythic) that grants a passive bundle while wielded (Mythic = +70 HP, +40 mana, +10% speed, +12% dmg, +10% gold/XP).

"Excellent" **classless weapons** (unique effects, dungeon-drop only) — a sampler:

- **Vampiric Fang** (35% melee lifesteal) · **Frostmourne** (40% lifesteal + frost slow) · **Thundercaller** (chain-zap) · **Midas Edge** (hits mint gold) · **Ragnarok Blade** (every 8th strike = slash-nova + meteors + shockwave) · **Doombringer** (execute <18% HP, +50% vs bosses) · **Singularity Edge** (every 5th strike opens a black hole) · **Worldsplitter / Earthshaker Maul** (shockwaves) · **Dawnbreaker** (piercing sun-slash + heal) · **Tempest / Stormfury Bow** (homing arrows) · **Gungnir** (5 piercing spears) · **Leviathan Hook**, **Galewing Glaive** (boomerang), **Chrono Edge** (CD-reset chance), **Wizardsbane** (+150% vs bosses), **Voidcaller**, **Shadowblade**, **Echo Rift**, **Soulthirst**.

Tools: **Woodsman's Axe** (Wood/Resin) and three **tiered Pickaxes** that gate the deep biomes — **Miner's** (t1, given free), **Embersteel** (t2, opens Emberdeep), **Blightbreaker** (t3, breaks the Blightcore).

The **Soul Split Wand** is a story-only mythic — useless everywhere except the final boss (see §14).

6. EQUIPMENT, ITEMS & CRAFTING

- **Armor slots (5):** helmet, chest, pants, gloves, boots. **Relic slots:** 4 → 5 at level 10 → 6 at level 20.
- **Sets:** Leather, **Bulwark of the Warlord**, **Windstalker's Garb**, **Runeweave Vestments**, Ranger's Leathers, and the endgame **Dragonscale Panoply** (+80 HP, +10% DR, +25% crit dmg). Wearing the set weapon adds a greater bonus.
- **Relics:** stat relics (Vigor, Swiftiness, Greed, Wisdom, Godheart...) and triggered ones — **Phoenix Heart** (auto-revive), **Thornmail**, **Aegis Ward** (block one hit/6s), **Shadowstep Sigil** (blink-dash), **Gorgon's Gaze** (petrify on hit), **Aetherwing** (flight), **Reaper's Toll**, **Heart of the Mountain** (mining).
- **Currencies:** Gold (drives everything), Silver, Bronze (carried, non-convertible). **The real game starts with no money.**
- **Materials:** research-gated **Slime** → **Iron Shard** → **Ember Crystal** → **Void Essence** → **Ancient Relic** (identified at the Science Lab); construction **Wood/Stone/Resin**; cooking **Herb/Raw Meat/Sorrowshard**.
- **Consumables:** Health/Mana Potions (drop-only), timed **food buffs** (Hearty Stew +speed, Warrior's Feast +damage, Sage's Supper +crit), the **Reset Potion**, and the endgame **Rewound Hour**.
- **Crafting:** foods + the Reset Potion; a freed member of the Ten (Toren) cuts costs 25%. **Inventory: 55 slots.**
- **Leveling:** XP curve $50 + (\text{level}-1) \times 30$, **cap 100**. Dungeon kills scale gold & XP by depth ($1 + 0.10 \times \text{floor}$).

7. THE VILLAGE — BUILDINGS

Deepwood starts **entirely in ruins** (every building destroyed). You clear rubble by hand (3 shovelfuls), then build in **3 stages** (each costs 3 Wood / 2 Stone / 1 Resin). A building only works when **fully built**. Buildings need a **blueprint** (starters: Farm, Tavern, Builderhouse, Cottage, Wall; the rest drop at fixed floors, all in hand by floor 30). Upgrades go **levels 1–6** (+2 worker slots & +25% output each; ~1,650g to max one, ~25,000g for the whole town).

Building	Leadership (VIP)	Does
Government	Chancellor	Taxes employed workers; Chancellor also auto-staffs idle villagers
Farm	Harvestmaster	Passive food (6/farmer/day); you can also hand-harvest (H, +4)
Fishing Dock	Harbormaster	Premium food (4/fisher/day), small morale
Hospital	Chief Physician	The "Sick Road" — heals wounded villagers who walk in; childbirth
School	Principal	Educates children into a random profession (24h)
Barracks	Warchief	Trains recruits into Warriors; armory; fields Soldiers in sieges
Science Lab	Lead Researcher	Identifies materials (unlocks skill spending); builds the Whisperstone
Bank	Treasurer	Interest on the treasury (~2.4%/day); 15% leaner payroll
Blacksmith (Forge)	Forgemaster	Gear shop (up to Rare, Epic with Toren); auto-arms the Barracks. <i>Gated at depth 35</i>
Tavern	Tavernkeeper	Lodges the unhoused (+morale vs the street)
Bar	Publican	Satisfies "social" need (town-wide morale); a small drink income
Marketplace	Merchant Prince	A pure gold sink that hosts wandering merchants; auto-sells surplus
Builderhouse	Master Builder + Foreman	Powers the repair crew — auto-rebuilds ruins
Mine	<i>(leaderless)</i>	Miners haul 2 stone + 1 iron / miner / day (+ember every other cycle)
Shrine	<i>(leaderless)</i>	Corruption's mercy (depth 30) — cleanses a demon back to life for 3 Sorrowshards
Watchtower	—	Siege foresight in 3 paid tiers (1h / 2h / 24h warning). <i>Until built, no siege warning at all.</i>
Cottage	—	Houses a paired couple for life — the population brake

Only Government (taxes), Bank (interest), and the Bar make village gold — everything else pays in food, arms, repairs, or knowledge. The design goal: approach self-funding, never a mint.

8. VILLAGER LIFE

- **Morale (0–10 personal, town = average).** Target inputs: fed (+2), employed (+2.2), housed (cottage +1.6 / Tavern +0.8 / street –1), armed town (+1.4), a Bar (+1), leaders, headcount. **Loneliness is a**

standing -2 (deepening to -3.5); widows mourn; the town's grief subtracts. Rewards: >8/10 speeds & heals the hero in town; **10/10** brings fireworks + a periodic **gold tribute**.

- **Food:** a "villager-days" stockpile; everyone eats 1/day. An empty larder past a 30h grace **starves villagers to death**.
 - **The Law of Despair:** a villager whose morale hits **0 begins to ROT** — a 6-hour redeem window; miss it and they **turn into a demon that spawns inside your walls** and infects neighbours. **Two fates:** an empty larder *kills* (a grave); broken hope *corrupts* (a turning). Warriors, shadows, and the Ten are immune.
 - **Births:** pair an unpaired man + woman at a **cottage** (for life) → a 24h pregnancy → a child born at the Hospital. **1-in-200 births is a HERO** (Barracks-only, graduates a powerful adult).
 - **Jobs:** assigned at each building; School graduates roll a random profession weighted toward common hands. **Leadership stats are never taught** — a leader is always a rescued VIP.
 - **Wages:** staff draw 1.5 gold/day; **workers you can't pay QUIT on the spot**. Taxes flow from the Government (morale-scaled), interest from the Bank.
 - **Leadership automation:** seating VIP leaders makes the town **run itself** (auto-staff, auto-repair, auto-heal, auto-sell, auto-research) — a tracked **self-sufficiency %** across five chore domains is the colony-sim payoff.
 - **The village fog:** away from home (or in the deep) you learn *nothing* of the town except through the **Log (L)** — unless you have **Telepathy** (Mage) or the **Whisperstone**.
-

9. SIEGES

- **Schedule:** first wave 24 in-game hours after the opening ends, then every 12h (resolves even while you're deep — you get an **away report**). **Siege tier = prosperity × depth**, not the calendar ($1 + 0.30 \cdot \text{floor} + 0.08 \cdot \text{pop} + 0.02 \cdot \text{morale}$); gentler until Orin is freed.
 - **Live waves:** raiders (up to 12) march from the **west/dungeon pit** and hammer the wall. **Once Orin is freed (floor 15) the EAST road silently opens as a second front** — you're never told; you discover it.
 - **The Black Tide:** every 6th siege (depth ≥15), tier ×2.2 + 2 — past what walls can hold. **Only stationed adventurers can turn it**. Telegraphed with an 8-hour omen that pierces the away-fog.
 - **Walls (2 ramparts, tiers 1–4):** HP 350 / 650 / 1050 / 1600; trap DPS at tier 2+; station slots 2/4/6/9. They breach at 0 HP but patch back between assaults.
 - **Defenders:** abstract "defense power" = Orin (4) + warriors + heroes (3 each) + stationed adventurers + Warchief + wall tier, × morale. Live: **Barracks Soldiers** (only the on-shift half answers), **Heroes** at 3× strength with rolled powers, and villagers who mostly **flee**.
 - **Warrior day/night shifts:** the corps splits into two 12h shifts; a siege at the 6:00/18:00 changeover catches the wall **half-manned** — the deliberate weak window.
-

10. THE OPENING

1. **Empty ruins** — a new game opens at **22:00 in the rain**; you crest the road to a dead town.
 2. **The arrival battle** — the three defenders (Roland/Wren/Castor) are already fighting raiders at the gate (a staged, un-killable teaching fight you join mid-swing).
 3. **Survivors emerge** — once the first wave breaks, **the Doctor and two farmhands creep from the ruins** — life returning to Deepwood — and the adventurers talk with them.
 4. **The tutorial (the Oath)** — a 3-step card: raise a **Wall** → **Farm** → **Cottage** (the founder's cache of 20 wood + 12 stone covers it exactly). Finishing it starts the siege clock. (*Cinematic, no HUD, until the tutorial begins; banked to save so Continue never replays it.*)
-

11. THE DUNGEON

- **100 floors**, a separate scene, cycling in **blocks of 5**: four regular layout families + a **boss floor** every 5th, **plus finale bosses at 98 & 99 = 22 boss floors, 22 unique bosses**.
 - **Regular floors** generate from **12 themes** (Terraces, Isles, Pillared Hall, Chasm Bridges, Gauntlet, Warren, Sunken Court, Cascade...), seeded by floor number (identical every visit), always winnable on foot, flood-fill-tested so nothing is ever stranded.
 - **Hazards**: 8–16 mines/floor; creative hazards (spike, flamevent, crusher@12, poison geyser@18), all telegraphed & capped below a one-shot; a seeded floor **surprise** (cache chest or trap) + a 32% chance of a mid-fight ambush.
 - **Difficulty** scales with depth (softcapped): ~5.5× HP, ~5.3× damage, +speed by floor 100.
 - **Entry (3 ways)**: hidden **Underdark doors** (one per floor, the frontier door wears a gold beacon), the village **Waystone** (blueprint at floor 20), and **Deep Shrine** → **Deep Shrine** travel (a shrine wakes at every 10th cleared floor).
 - **The only gate is a "leave" gate** at the entry (a mid-fight escape hatch); clearing a floor unlocks the next, and a cleared floor **stays cleared** for the run.
-

12. THE BOSSES (all 22)

Each has a bespoke arena, body, movement profile, a **signature ability**, and reactive **passives** (none raise damage — they gate *how* you may fight, each with counter-play).

Floor	Boss	HP	Signature	Key passive(s)
5	The Gravewarden	1000	Grave Grasp (root)	pure pattern
10	The Frost Monarch	780	Rime Lance (tracking freeze)	stagger armour
15	The Cinder Colossus	1100	Magma Wake (fire line)	riposte
20	The Weaver	720	Web Snare (root-zone) + summon	soulbind
25	The Stormcaller	880	Thunderstrike (bolt + stun)	skyfall
30	The Void Sovereign	1220	Void Rift (pull singularity)	sidestep
35	The Hollow Choir	1150	Dissonant Scream (disorient)	false_twin, soulbind
40	The Ashen Penitent	900	Prayer Pyre (flame front)	riposte, famine
45	The Gaoler	1500	Iron Maiden (cage/root)	tether, stagger armour
50	Sablefang	820	Pounce (leap)	sidestep, rhythm_punish
55	The Effigy	1750	Splinter Burst (ring)	afterimage_trap
60	Mourncaller (fly)	1050	Keening (homing swarm)	soulbind, mirror
65	The Unseen (fly)	980	Ambush (blink behind + stun)	phase, afterimage_trap
70	The Warden of Nails	1600	Impale (tracking nail)	skyfall, dread_ward, riposte
75	The Twin Despair	1250	Pincer Lunge + clone	covenant, sidestep, phase
80	The Cinderking	1900	Eruption (spreading wave)	afterimage_trap, mirror, famine
85	The Glass Saint	1450	Refraction (5-beam)	mirror, dread_ward
90	The Last Man	1300	Riposte Stance (parry)	rhythm_punish, phase, covenant
95	Seraphiel, the Last Light (fly)	2400	Judgment (light wall sweep)	enrage/frenzy
98	The Abyssal Leviathan (fly)	2800	Tidal Crush (floor wave)	enrage/frenzy
99	The Eclipse Titan (biggest in game)	3300	Black Sun (shrinking safe ring)	false_twin
100	The Fallen Wizard	4000	Unwriting (void under you) + Mirror Legion	soul_split (see §14)

Passive vocabulary: *sidestep* (dodges melee), *riposte* (counters your wind-up), *rhythm_punish* (every 4th quick hit), *stagger_armour* (chip bounces — heavy hits only), *phase* (intangible for 2s after your hit), *tether*, *famine* (drains mana), *afterimage_trap* (punishes standing), *dread_ward* (hurt only from behind), *mirror*

(reflects projectiles), *skyfall* (anti-air), *false_twin* (fake copies), *soulbind* (your damage heals it until you break the runes), *covenant* (two bodies heal each other).

Weapon counters (shallower boss floors only — the deepest 12 demand mastery): each counterable boss has ONE countering weapon (+30% damage & a special edge); sword builds a stagger-stun, archer strips guards, mage hexes. **Enrage** at 50% HP (apex 60%), apex bosses **FRENZY at 25%**.

Boss rewards: guaranteed material + guaranteed gear (assembling class sets) + a 15% Excellent-weapon jackpot (L25+) + a potion restock every time.

13. THE BESTIARY — 56 hostile mob types

- **6 regular archetypes** (cycling by depth, mixable): **Orc, Blood Fiend, Demon, Wraith, Bone Golem, Rotfiend** — layered with behaviors (**shield, healer, summoner, caster, dasher**) and glowing **elites** (×2.4 HP, telegraphed slam, double reward).
- **27 special mobs**, each a distinct attack, curated into **5 dungeon depth-biomes** of 20 floors (rot & beasts → haunts & gazes → the warren → the arcane siege → the apex):
- *flyer, bomber, spitter, charger, stalker, blink_archer, warlock, hexer, runecaster, weaver, leech, burrower, warper, plague, wailer, ballista, swarm, frostling*, and the newest 9 — **sentinel** (sweeping beam turret), **brood** (splits on death), **arcbinder** (chain-lightning snipe), **warchief** (rage aura), **voidling** (blink-flanker), **gazer** (freeze-gaze cone), **skycaller** (falling-strike rain), **vampire** (lifedrain leaper), **juggernaut** (guard-tank).
- **1 siege raider** (the goblin marauder; the Black Tide is the same raider, more & tougher).
- **The turned** — every villager who rots becomes a demon inside your own walls; at the Harvest the *whole* town turns.

14. THE UNDERGROUND (Terraria-style minable world)

A **4,200 × 1,200-tile** world (12px blocks), fully **minable everywhere**, chunk-streamed, and **persistent** (your digs & puzzle flags save as a diff). Entered from the village **cave mouth**, left via an **E exit** at the entry ledge.

5 depth-biomes (each ~240 tiles), each with a hardness and a **pickaxe tier gate**:

Biome	Tier	Mine gate
Rootearth (soil)	0	Miner's
Stonewarren (stone)	0	Miner's
Fungal Hollow (mushroom)	1	Miner's
Emberdeep (magma)	2	Embersteel
Blightcore (corruption)	3	Blightbreaker

- **Mining:** hold left-click (smart-cursor on Shift); tile HP by biome (+2 for ore). The **tier gate** walls off deeper *rock* for loot — but the **carved true path down is always open**, so descent never needs a better pickaxe. Each pickaxe hides in the deepest biome the previous tier can mine (earn your way down).
 - **Terrain:** one switchbacking true path pierces every seal; a region field shapes **grand open caverns** vs **tight warrens**; chasms drop between levels; cellular-automata smoothing gives real cave rooms; dark textured back-walls.
 - **Content per chunk:** loot chests (16%), traps (14%), depth-scaled **mixed mobs** (5–6 types/biome) + elites (10%), **lever-vaults** & **rune-vaults** (puzzles), crystal geodes, mushroom groves, **lava pools** (Emberdeep+, 7 dmg/0.4s), and the **100 scattered floor-doors** (one per dungeon floor; enter → floor → return to the door).
 - **Lighting (Terraria-dim):** ambient scaled to 40% with per-biome tint, your carried **torch** (a PointLight2D), and **placed wall torches at ~30% of spots** — warm light pools with dark stretches between.
-

15. THE CAST

The three opening heroes (level-0, mortal, permadeath — station on wall/city/house):

- **Roland Ashmark** (blade, Shield Wall — canonically survives to floor 100) · **Wren Falkner** (bow, Twin Nock) · **Castor Hale** (spear, Phalanx Sweep).

The deep nine adventurers (chained one per marked depth, freed with E): Mira Coldbrook (7, Frostbrand), Jorun Pyke (13, +dmg per dead ally), Essa Nightbrook (18, piercing), Darvin Mott (23, kill-heal), Kessa Vayle (33, double retaliation), Brannoc Tor (43, Fifth Blade), Liselle Dray (53, poison), Hakon Vey (63, once-a-siege revive), Sorrel Ka (78, execute).

The Ten — "Unbreakable" legends in gilded trophy vaults (each a permanent village boon; unkillable at the Harvest; **all ten must be freed to open floor 100**):

Name	Floor	Boon
Brannoc, the Wall That Stood	22	Warriors train 2×, wall 1.5× stronger
Maera, the Last Lightmender	26	Doctor heals 2×; once/siege pulls someone from the brink
Sylvara, Warden of the Old Groves	31	Farm output doubled
Kaldos, the Tidecaller	34	Dock hauls materials as well as food
Toren Ashvale, the Forgefather	38	Forge sells up to Epic; crafting 25% cheaper
Dorian Vail, the Coinbinder	43	Bank interest doubled; dropped gold half-insured
Mirielle, Voice of the Old Crown	47	Government runs further; leaders worth double
Elenwe, Archivist of the Broken Age	53	All materials understood at once
Seraphel, the Lightkeeper	58	Halves village withering; grief passes 2×
Ilo, the Nameless Bard	63	Tavern lifts the whole village

When the last of the Ten is freed they **hand you the Soul Split Wand** (Elenwe knew what it was, Toren reforged it, Ilo remembered *why*).

Orin — introduced as a wandering mage who arrives at the west wall after you first reach **floor 15**, tells a story that *mirrors your own arrival*, then holds the nightly watch casting meteors, growing stronger every time he "falls" and reforms (~12h). He is **secretly the Monarch of Despair** — the farmer admiring his crop.

16. THE ENDGAME — THE HARVEST

The finale gate (floor 100) opens **only to a perfect village**: 0 ruins, every role staffed, **morale 100**, and **all Ten freed** — because a perfect village is exactly what Orin was farming. Floor 100 is an **empty throne**; you carry the false victory home.

1. **False victory + feast** — the town erupts; morale peaks; *"It's over. We won."*
2. **The reveal** — Orin reveals himself as the Monarch: *"Deepwood was never being defended. It was being harvested."* The people **kneel and begin to turn**.
3. **The fight** — the whole village becomes level-100 despair, streaming in from both edges **wearing their own names. Wren & Castor turn (real deaths); Roland holds**. The **Ten (and Roland) hold the lanes**, unkillable.
4. **The Devourer** — Orin starts weak (his power must be *eaten*), devouring the living turned to grow up to 2× size. **A race: every villager you kill is one he can't eat**.

17. THE FINALE BOSS & THE SOUL SPLIT WAND

The Fallen Wizard (barely taller than you — power, not bulk): a crumbling red aura (5 dmg/tick), reflex blink-on-hit, and a **Mirror Legion** of up to 6 echoes.

"An undivided soul cannot be destroyed":

- **Soul Ward:** with **no echoes out** he takes **only 50% damage**; each living echo cracks the ward **+25%** (up to 2× at the full legion of 6).
- Any ordinary killing blow — even a DoT — just **reforms him at 1 HP** ("THE UNDIVIDED SOUL REFORMS").
- **The Soul Split Wand is the one exception:** it **scatters his soul for exactly 4 seconds**, during which the ward vanishes and he is **mortal** ("HIS SOUL SCATTERS — STRIKE NOW!"). **The kill: let the legion grow, survive it, hit him with the wand, and burst him inside the 4-second window.**

18. THE SHADOW COURT & THE TRUE ENDING

Kill Orin and **"Despair is dead"** — sieges end forever (the apparatus dies with the farmer). Your true nature fully wakes and you perform your first royal act: the **Shadow Army** — every fallen villager **rises as a shade of themselves**, names/homes/jobs/bonds kept, raised whole and content. The Ten remain flesh among the shadows. Beating Orin **permanently unlocks the Shadow Monarch class** for all future runs.

Among the spoils is ⌚ **The Rewound Hour** (one per world) — a **turn-or-shatter** choice:

- **Turn it** → **New Game+**. The world rewinds to ruin, but **you and everything you carry are immune** (level, class, skills, materials, equipment, Monarch stage, and your worlds-walked count). *"You remember everything. It remembers nothing."*
- **Shatter it** → **the True Ending**. Break the cycle forever — the one victory no Monarch before ever managed: to let a won world simply **be, and end**. *"I did not break his cycle to build my own."* Ilo names you **"the Monarch Who Let It End."**

The Chronicle (100%): seven lines that must all hold at once — every taken soul home, every bond honored, all Ten freed, the skill graph fully explored, Deepwood at its peak, Despair destroyed, the Shadow Army raised. "★ *THE CHRONICLE CLOSSES COMPLETE — 100%.*"

APPENDIX — KEY NUMBERS
